COLEMAN, ALTA.

Board of Trade elect officers for coming year

A new slate of officers for the coming year was elected to office at the recent Coleman Board of Trade meeting.

To head the Board of Trade again are President William Holby, vice-president, Dave B. Young, secretary, R. J. Hill, and treasurer, Charlie Freeman. The executive will comprise: Tom Coleman, Chris D. Rogers and Harry Boulton, one-year terms, and Jack Chalmers, J. C. Colwell and Rudy Yeliga, all with two-year terms.

During the business course of the meeting the board discussed three possible locations in Coleman that would make suitable Greyhound Bus stops.

This matter is being looked into by the Board of Trade as the present location of the bus stop is on the extreme eastern outskirts of the town, about a half mile from the town centre. It provides no shelter or facilities for incoming or outgoing passengers.

Highway entrance

The board also discussed the possibility of construction of a proper entrance from Coleman on to the Kananaskis Highway. The route for this project would commence near the underpass on the No. 3 Highway and would proceed through Coleman park area and straight north to the entrance to the Kananaskis.

Having the entrance to this road nearer the town centre would direct traffic into town and would make it easy for tourists and other visitors to find the entrance to the scenic highway, at present marked only by small board signs.

During the course of the meeting Dave Young, manager of the Coleman Collieries, informed the meeting that the outlook for the coal industry for the forthcoming year was very bright.

Ice Clipping Machine Busy on Roads

Roads, snow and ice, have been a great hazard to motorists, also a head ache to the crew of the Department of Public Works, who have worked long hours into the night, sanding, snow-plowing and also shovelling the snow from the highway, all to no avail, the ice conditions seemed unconquerable. A fork-shaped scraper was attached to the snow plow to try and penetrate the ice. This did help to a certain extent in keeping the cars from sliding off the grades.

Mr. J. Hanrahan reports that ice clipping machine has arrived from Edmonton and is proving to be a great help.

Goes to Calgary To Visit Husband Hurt in Accident

Rev. Roy Chubb of Blairmore was a Calgary visitor this week. Mr. Chubb escorted Mrs. R. Sloop to Calgary to visit her husband. Rev. R. Sloop, who is a patient in the Calgary General Hospital.

Mr. Sloop, who also is the pastor of the Church of the Open Bible in Blairmore, operates a truck hauling mine props for a local mine. He was in the act of unloading the props at about 6:30 a.m. Monday when struck on the head by a log that rolled from the top of the truck.

Mr. Sloop was working with Lloyd Erickson of Bellevue and Clifford Schoff of Blairmore at the time of the mishap. He was taken to the Crow's Nest Pass Municipal Hospital immediately and was transferred by a Lethbridge ambulance to the Calgary General Hospital on Tuesday.

Mr. Sloop was operated on in the Calgary hospital Tuesday evening and a large blood clot was removed from his brain. He had not regained consciousness. His condition was reported as fair.

It is wise to wear sweaters separately, since lighter colors may tend to pick up excess dye from darker ones.

Kimberley Wins Over Coleman

Kimberley Legionaires showed their hockey experience by beating the youthful Coleman Grands 15-10.

The Coleman crew almost upset the visitors when they narrowed the margin to one goal early in the third period, but Kimberley was not to be deterred and again rallied for five more goals, while the Coleman squad counted only one.

Kimberley led 6-2 at the end of the first period; 10-6 at the end of the second, and 15-10 Coleman Grands 5-4 in the third to take the game 15-10.

Leading scorer for Kimberley was Sorenson with 4, Livngstone with 3, R. Mathews, Garlinger and Gultner had two each, while singles went to Sullivan and M. Mathews.

Kryczka paced the Coleman attack with 3 goals, Scodellaro and Flievwich scored two, while singles went to Cerney, Begun and Fraser.

The cleanly played game was marred by one single penalty. On the whole the Coleman team played good hockey and young Joe Joseph in the Coleman nets played well after his first period jitters.

With the addition of Bosetti, Anderson and possibly Colings in the near future the Coleman squad should make it interesting even for the Kimberley Legionaires.

The Coleman fans are to be congratulated for their support of the Coleman Grands and other minor hockey in the town. Coleman always has a good hockey team and will continue to have with the support of the faithful fans.

The next home game will be on Saturday, January 14th, when the Grands play Cranbrook in the Coleman Arena at 8:30. Don't miss this one as both clubs are evenly matched and should make for good hockey.

SCORING SUMMARY

First Period: 1. Kimberley — Sorenson, 1:15. 2. Coleman — Cerney (Makowichuk), 3:50. 3. Kimberley — Livngstone (Sorenson), 4:25. 4. Coleman — Scodellaro (Kryczka), 5:40. 5. Kimberley — Sullivan (Sorenson), 9:45. 6. Kimberley — Garlinger (M. Mathews), 10:45. 7. Kimberley — Sorenson (R. Mathews), 15:15. 8. Kimberley — Garlinger (Gultner-M. Mathews), 16:25.

Second Period:

9. Coleman — Kryczka (Fraser), 1:50. 10. Kimberley — Sorenson (R. Mathews), 4:00. 11. Coleman — Begun (Kryczka), 4:45. 12. Coleman — Fraser (Kryczka-Begun), 6:30. 13. Kimberley — Livngstone (M. Mathews — Rotchinski), 7:05. 14. Kimberley — Sorenson (R. Mathews), 8:40. 15. Kimberley — Livngstone (R. Mathews), 10:30. 16. Coleman — Flievwich, 16:35.

Penalty — Gultner, 19:50

Third Period:

1. Coleman — Kryczka (Zembiak), 1:10. 2. Coleman — Kryczka (Scodellaro), 1:30. 3. Coleman — Scodellaro (Kryczka), 1:55. 4. Kimberley — Gultner, 9:00. 5. Kimberley — R. Mathews (Sorenson), 11:25. 6. Coleman — Flievwich (Begun), 11:35. 7. Kimberley — Gultner (Garlinger), 13:40. 8. Kimberley — R. Mathews (Sullivan), 16:00. 9. Kimberley — M. Mathews, 17:55.

Fernie and Coleman Tie in Overtime

FERNIE — Monday afternoon, January 2, Coleman Grands and the Fernie Rangers battled to a 4-4 tie in a regular ABC hockey game.

The only goal of the first period was netted by Tony Zembiak of the Grands. Early in the second period Walt Tymchyn put Coleman ahead 2-0. Midway in the second, Vic Marasco scored Fernie's first goal to make the score 2-1. Halfway in the third period Harold Uphill tied the game up for Fernie and five minutes later Allen Niedig put Fernie ahead for the first time in the game.

Walter Tymchyn scored his second goal of the evening to tie the game up for the locals. In the overtime period both teams scored with Wilf Ashmore scoring for Fernie and Jerry Scodellaro markman for Coleman.

Urges Industries be Encouraged to Locate in the Pass

Speaking here at a public gathering on Saturday night, December 17th, Ben Swankey, Provincial Leader of the L.P.P., had the following to say about bringing new industries to the Crow's Nest Pass:

"In spite of the fact that temporarily the mines are working steady, the outlook remains grim. This is not only my own view; it is also the view of the Alberta government and of the coal operators. The provincial government in its brief last month to the Gordon Commission on Canada's Economic Prospects stated that 'no substantial immediate relief is in sight.' The coal operators in a similar brief predicted that in the next five years underground coal production would decline by 64% and strip mine production by 25 per cent. What this will mean in terms of lay-offs uprooted homes and business failures is not hard to see. All sections of the community will suffer."

"The solution is not to be found in compelling homes, industries and railways to use coal, as the coal operators suggest. Nor is it to be found in using coal to produce electricity as the government suggest is may be done at some future time."

"The basic problem of our coal industry is our inability to supply the central Canadian market. To do this the federal government needs to take action along two lines:

1. Stop the dumping of U.S. coal into Canada as long as Canadian miners are idle.

2. Increase subsidies to help send our coal to Central Canada.

"But even these two steps by themselves are not enough. Still more far-reaching measures are needed to save the coal industry and to maintain prosperous communities in the Pass. What we need is the industrialization of the Crow's Nest Pass. Let me give a few examples of what could be done."

"Our coal could also be processed for its by-products, such as coal tars. But more important, these by-products should in turn be used to establish industries which will make finished products from them. It is well-known that bituminous coal can be used to

make dyes, insecticides, solvents, explosives, plastics, drugs, paints and rubber chemicals. Why not make these here in the Pass?"

"The huge natural gas field at Pincher Creek, Canada's largest, could be the basis of a big petrochemical industry in that area. Not only should various products be extracted from the natural gas before it is exported as is planned now, industries should be established which will make finished goods out of these by-products. In addition natural gas can be used as a raw material for manufacturing, as is done in Edmonton industries today."

"We have enough timber in the Pass to warrant the establishment of a pulp mill here."

"Finally, and most important of all, we have everything necessary for the establishment of a steel industry in the Crow's Nest Pass. We have coal for coke, limestone, natural gas and iron ore. A huge bed of iron ore extends from about one mile north of Burnham over eight miles to the north-west. In some places it is 10½ feet thick, the average thickness is probably five feet. How wide it is, how many millions of tons it contains, has not been made public. No doubt there are other deposits in the area of the Pass. The Burmis deposit assays at about 40% iron and contains about 54% of titanium dioxide. To separate the two is not easy, but modern technique can find the answer."

"A steel industry, bringing in its wake dozens of subsidiary industries, would not only help to create a stable market for coal. It would provide literally thousands of additional jobs of various kinds."

"If private capital refuses to establish such industries in the Pass, then I think the government should step in. Our province and country have the money and the know-how. The industrialization of the Pass should not be held up by apathy or opposition."

"Such industrialization would guarantee prosperity today and a future for our children. It is an issue around which all citizens can unite, regardless of political or other differences. I appeal particularly to the coal miners to press for such new policies."

Goodwill W. A. Elect Officers

At the December meeting of the Goodwill W. A. the following officers were elected for 1956:

President — Mrs. Norma Lowe.

1st vice-president — Mrs. S. Murdock.

2nd vice-president — Mrs. J. Petsuk.

Rec. Secty. — Mrs. M. Dunford.

Treasurer — Mrs. H. Zak, Jr.

Corr. Secty. — Mrs. M. Johnson.

Devotional Convener — Mrs. A. MacQuarrie.

Christian Education — Mrs. A. Halderson.

Christian Stewardship — Mrs. C. Coover.

Visiting and Fellowship — Miss M. Roushead.

Manse Committee — Mrs. C. MacQuarrie and Mrs. C. Coover.

Sale of Cards — Mrs. J. Owen.

A vote of thanks was moved to retiring President Mrs. J. Colwell and other officers for their faithful work in 1955.

Two large parcels were made up with gifts supplied by each member. These parcels were presented to two teen-agers who were "shut-ins" over Christmas and New Years.

Mrs. Isabel Petsuk was thanked for conveying the turkey supper, which was very successful.

Mrs. R. McAulay was presented with a small gift on behalf of the auxiliary.

Husbands of the members were invited for a social hour at the close of the meeting. Christmas carols were sung and two films on curling were shown.

Lunch was served at the close of the meeting.

Coleman Bantams Down Blairmore Bantams

Father Fleming's Elk Bantams handied their rivals, the Blairmore Bantams, coached by Wally Smith, 3-1 loss at the local arena.

The first period was scoreless, Coleman counting 3 goals in the second period against one for Blairmore. A crowd of about 25 adults and children were present at the game.

As soon as the schedule is drawn up the games will be advertised.

Line-ups are as follows: Blairmore: Bob Emmerson, goal; defence — Brunga, Stevula, Brown, Leskoski, Pinkney, King. The first line — McNiven, Smantotto, Gilbert, Second line — Townsend, Cecchini, Moltsac. Third line — Stella, Rae, Evans.

Coleman: Roy Silvers, goal; defence — Jim Lant, Joe Warcean, Allan Gate, Bill Goodwin. First line — Jim Nowasos, Nick Misura, Jim Atkinson. Second line — Reynolds Bartoletti, Harvey Meglin, Don Townsend. Third line — Leslie Peknik, Ronny Koury, Brent Fraser.

High River (Alta.) Times: "Someone has said that the main thing that worries businessmen these days is the number of unemployed they have on their payroll. The same thing characterizes the federal government except that it does not worry about it. Businessmen, however, have cause to worry for they have to pay for the government's unemployed as well as their own."

No Jobless Due To Coal Industry Decline

EDMONTON — (CP) — Nearly two years ago Alberta was faced with the prospect of about 1,000 coal miners being thrown out of work by the closing of mines. But officials of the provincial government now say there is no unemployment due to the decline of the coal industry.

The job of rehabilitation cost the government about \$60,000 and resulted in the creation of two ghost towns and the movement of 325 families.

This was revealed in a summary of work done by the provincial coal miners' rehabilitation committee, established in April, 1954, with a grant of \$100,000 from the provincial legislature.

Two ghost towns

The summary shows that rehabilitation of unemployed miners was accomplished mostly by persuading the men to go into other work and by the province helping with the cost of moving families and effects.

The two ghost towns are Nordsee where 183 families were moved at a cost of \$34,879 and Alexo where 26 families were moved at a cost of \$3,666.

Industries and Labor Minister Reiseron paid tribute to the miners and their union officials. He said they showed great initiative and were anxious to adapt themselves to other work.

In the months prior to the formation of the committee, coal production and marketing were declining gradually, due in a large part to the railways' conversion to diesel power.

The first blow was in the Crow's Nest Pass area of south-western Alberta, where initial layoffs numbered about 800 men when the International Mine at Coleman was closed.

Then the Bryan Mountain Mine closed at Tobin in the Coal Branch and declining markets forced reductions in staff at the McGillivray Mine in Coleman, Brazear Collieries at Nordsee, west of Rocky Mountain House, and Luscar Collieries at Luscar, in the Coal Branch.

Government estimates counting men unemployed and their families, showed between 2,500 and 3,000 persons were affected. During the summer of 1954, further layoffs occurred at Luscar and at West Canadian Collieries at Blairmore.

Where miners could not find work close to home, the government paid transportation costs to centres where work was available.

In 1954, the committee helped to find employment for 248 men in the Coleman area. Furniture and effects of 37 families were moved at government expense and 27 transportation warrants issued to miners leaving Coleman.

Seventy-six men from Nordsee were placed in other employment in 1954 and the effects of 50 families were moved out of the area. Another 60 men from the Coal Branch were placed and the effects of 36 families were moved.

The score for 1954 was 384 placements and 123 families and their belongings moved. Total cost of the program in 1954 was \$17,408.

There were signs that the industry might revive in 1955 but in April about 100 miners were laid off at Coleman.

APPEAL TO GOVT.

Miners and communities appealed to the government to provide employment by building forestry roads and bridges in the area by starting a reforestation program and by subsidizing the cost of running a bus to take miners to work at Fernie, B.C., 60 miles away, where work was available.

A number of men were put to work on the Rocky Mountain estate forestry project and the bus transportation to Fernie was started. The only recommendation not carried out was the reforestation project.

Fifty men worked on highway construction in the Crow's Nest Pass, the forestry branch employed 34 men and another 34 were using the subsidized transportation to commute to jobs at Fernie.

Another 98 men were placed in the mines at Michel, just across the border in B.C., and five local lumber mills employed 276 men.

Michael Ferby dies following lengthy illness

HILLCREST — Michael Ferby of Hillcrest passed away in the Crow's Nest Pass Municipal Hospital following a period of ill health.

Mr. Ferby 78, was born in Kniazzy Galicia, Poland on November 18, 1887, coming to Canada 45 years ago. On his arrival here he settled in Fernie, B.C., where he worked for a short time before coming to Hillcrest to live.

During his many years in the Crow's Nest Pass he was employed as a carpenter at the Bellevue mine until his retirement in 1950. He was a member of the Catholic faith and of the Bellevue local of the United Mine Workers of America. He was predeceased by his wife at Hillcrest in 1933.

He is survived by three daughters, Mrs. Mae Gregory of Calgary, Mrs. Irene Boris of Nanaimo, B.C., and Mrs. Annie Wakulak of Burnis.

Prayers were said at the family home Monday evening. Requiem High Mass was celebrated from St. Theresa's Catholic Church in Hillcrest at 10:30 Tuesday morning and interment followed in the Hillcrest Catholic cemetery. The Reverend L. Carroll of Bellevue officiated at the services.

Coleman oldtimer passes

Louise Vanden Dries, 76, of Coleman passed away in the Crow's Nest Pass Municipal Hospital on Saturday afternoon, December 31.

She was born in Essen, Belgium, November 1, 1879 and came to Canada 43 years ago settling in Coleman. In 1926 she moved to the United States where she lived for 15 years. She then returned to Coleman.

She was predeceased by her husband in Coleman ten months ago, and one son and daughter in the States.

Surviving are one daughter Mrs. Mary Joseph and fifteen grandchildren and twenty-seven great grandchildren.

Prayers were said on Tuesday evening, 7:30 p.m. Requiem High Mass was celebrated in the Holy Ghost Catholic Church in Coleman at 10:30 a.m. on Wednesday and interment followed in the Holy Ghost Catholic Cemetery. The Rev. D. Fleming of Coleman officiated.

Minerva Chapter O. E. S. Elects Officers for 1956

Heading the Chapter for 1956 is W. M. Sister E. Ouearard with other officers as follows:

A.M. Sister, A. Wilson; A.P. Brother, C. Freeman; Secretary, Sister P. Jenkins; Treasurer, Sister C. Garner; Cond., Sister M. Welten; Assoc. Cond., Sister I. Coover; Chaplain, Sister E. Wilson; Adm. Sister J. Dunford; Ruth, Sister K. Pawlik; Sister D. Colwell; Martha, Sister G. Wood; Electa, Sister M. D'Amico; Organist, E. Owens; Marshal, Sister D. Collins; Warden, Sister C. Lonsbury; Sentinel, Sister A. Murdock.

ENJOYS SURGE

At Coleman, hardest hit by the layoffs, business enjoyed an upsurge during the last few months and there is more prosperity than residents have seen in some time, the summary said.

Officials said the reason is pay cheques are fatter and come more regularly. The men working in B.C. are paid on a full-time basis, which is better than what they received even before the mines closed, and in addition many men on their own initiative have gone into the oil and gas industry at nearby Pincher Creek.

To date 326 families and effects have been moved at government expense and 129 travel warrants issued. Following are the number of families moved by districts: Crow's Nest Pass, 64; Nordsee, 182; Alexo, 26; Luscar, 28; Robb, 19, and Coal Valley, 8.

Humboldt has fully automatic telephone system in operation

REGINA. — A 30-second procedure December 6, put a new \$260,000 telephone system into operation at Humboldt, Sask. A main cable was cut and some 600 insulating "picks" were put in to change Humboldt's system from manual operation to a fully automatic dial system.

The 30 seconds marked the culmination of over two years of planning and actual construction and installation work by contractors, and by staff of Saskatchewan Government Telephones to give Humboldt one of the most modern telephone exchange buildings and equipment in the province.

In the two years, a handsome Saskatchewan brick tile and concrete building was constructed across the street from the old exchange building by the B. & R. Construction Company Ltd. of Prince Albert, and fully automatic dial equipment and new long distance switching mechanism were installed by the British General Electric Company, with the finishing touches and final testing work now completed.

In addition to the new exchange building and equipment, outside telephone lines have been rebuilt where necessary in Humboldt and on the "company" circuits with new cradle dial telephones supplied for each subscriber.

W. A. Sheardown of Saskatchewan division commercial superintendent, said "Saskatchewan Government Telephones officials are confident that this conversion to dial will provide more and even better telephone service for the Humboldt exchange area, and that it fits into the system's long range plans."

He said that the new five-digit telephone numbers will fit into the continent's operator distance dialing plan, making it possible in the future for an operator in distant Canadian and American locations to dial Humboldt numbers directly.

Although the new equipment is simply a mass of wires and "gadgets" to the layman, staff members were able to explain in simple language just what happens when a telephone call is dialed.

No public ceremony took place when the cut-over was made because there was no time for formalities. The goal was to make the switch from the old to the new system with no interruption in the service.

Belting Bionda impresses fans

The aggressive and belting style of play of Jack Bionda, youthful defenseman of the Toronto Maple Leafs, has made quite a hit with Toronto fans. The 22-year-old, 170-pound six-footer was called up by the Leafs this season to take the place of the injured Tim Horton. He has played so well to date that he may have won himself a permanent berth with the team.

Bionda entered the NHL much the same way as did Bucko McDonald and Flash Hollett. They all came into hockey as a result of lacrosse and when they did they could hardly stand up to Brampton, Ont., five years ago to play lacrosse. After the lacrosse season finished he was asked to try out with the Junior "B" team there. He could hardly stand up to the team. He started but he persevered and after a season with Brampton moved up to Toronto Marlboros Junior "A" team.

Bionda was a star with the Victoria Shamrocks, 1955 Minto Cup winners, emblematic of the Canadian lacrosse championship.

THE KIWI
The Kiwi, New Zealand's best-known bird, is a small, plump, downy, tailless and almost wingless bird, is waging a losing battle for survival against the depredations of stoats, ferrets, rats, house cats, and hush fires.

Monkeyshines

A New Orleans businessman, long at odds with a competitor, turned up at the police station with this complaint:

"It's the limit. You know the kind of things he's been doing all along. Well, it's gone too far now. He's gone and bought a monkey."

"He shaved the monkey's head to make it look like mine. And now he's dressing that monkey to make him look like me!"

The police decided there was nothing they could do about such monkeyshines.

Santa Claus will make Far East trip

OTTAWA. — Santa Claus went winging his way to the Far East in late November with Indian Christmas cheer for Canadian Armed Forces personnel serving in Indo China.

A Royal Canadian Air Force aircraft took off from Montreal for Saigon November 25, loaded with parcel mail and Christmas fare for officers and men of the military component of the Canadian delegation to the International Supervisory Commission. Each soldier's next-of-kin had been invited to send up to one 10-pound parcel.

The aircraft will return from Indo China on December 15 carrying parcels and mail back to Canada.

With refrigeration facilities practically non-existent, the provision of a proper Christmas menu for troops in Indo China has created quite a problem for Army catering authorities. This year's solution to the problem is pre-cooked canned turkeys and chickens which will keep fresh for an indefinite period without refrigeration.

In addition to food, the menu for Christmas will include cranberry sauce, timed ham, plum pudding, fruit cocktail, coffee, nuts and candy.

Packs of various sizes have been prepared so that each man will be assured of a complete Christmas dinner with all the trimmings even if serving in an isolated locality. The aircraft also carried entertainment, films and sports equipment supplied by Army welfare; current magazines and periodicals from the Canadian Legion; individual ditty bags donated by the Royal League of Canada; and a gift shipment of Canadian cigarettes from the Province of Ontario.

The lean minority

That minority which has no need to reduce would often like to take a few pounds and to them calories are not a bugbear. To gain those desired extra pounds it is a good idea to work out a balanced diet from Canada's Food Rules for the necessary amount of food and then add some of the foods the over-eaters are told to avoid. Creamy soups, rich desserts, ice cream and between-meal snacks, providing they don't interfere with regular meals, should add a few ounces. Plenty of milk, which won't actually add weight but will provide basic nutrients, should be taken in larger quantities than usually recommended. Fruits such as bananas and apples, too, should be on the menu. If very much underweight, a doctor should be consulted to discover any underlying cause for the condition.

ROLLING LAUNDRY TABLE

A rolling table in the laundry is often more convenient than a built-in counter, because it can be right where you need it beside the washer for sorting the laundry, ready in any spot for sprinkling, and beside the ironing board to hold clothes before ironing and flat presses after ironing.

42" Cut-out

Striking lawn or roof decoration Santa, reindeer

This striking lawn or roof decoration will add to the holiday spirit of the whole neighborhood. The pieces are cut out temporary hard board. It is an ideal job for the jig saw, or hand saw. The deer are thirty-six inches long at the ground level and the same height to the tip of the horns. The directions on the pattern are in step-by-step detail from cutting out the figures to the final finish with a coat of good varnish to withstand the weather for many holidays. The price of the pattern is 35c. Add 2c for first class mail, or 5c for air mail. Be sure to ask for pattern 360 and include name and address.

These angelic figures made of soft paper and painted in bright colors will be found most useful at Christmas time. The pattern gives tracing diagrams for a variety of sizes and styles. Santa stands 6 inches high holding a song book. There are several sizes for tree decorations. And for hand-painted greeting cards that just fit an ordinary envelope. Each step is illustrated on the pattern from tracing the outline of the figures to the fascinating part of using ordinary water colors to bring out the figures.

The unusual realism of these figures. This pattern is 320 and may be ordered separately at 35c. It will be included in the Christmas Decorations Packet of five standard size patterns for only \$1.50 postpaid.

Address order to: Home Workshop Pattern Service, Department P.L.L., 4133 West Fifth Avenue, Vancouver, B.C.

'Stone Age' man attends congress

The scholarly report of the Pan-African Congress on Pre-history at Livingston, Northern Rhodesia, was broken one evening by the sudden appearance of a Stone Age man. He quickly explained that the purpose of his visit was merely to demonstrate the manufacture of stone tools and weapons.

Squatting on a boulder, he took a big piece of flint and by swift, left blows with a pebble, rapidly shaped it into an axe-head. Speed was essential, for in primitive times there was little leisure for making tools; the search for food took up most of one's day, said the Stone Age man, impersonated, it should be said, by Dr. L. S. B. Leakey, the noted Kenya anthropologist and curator of the Nairobi Museum.

Next, with the jawbone of an antelope, Dr. Leakey showed how by tapping the edges of a shaped stone with the rounded side of the bone, stone could be chipped to a fine cutting edge.

Hitting a stone at an angle on a stone "anvil" was another way of giving an edge to a flint. There were other more skillful methods of doing this, such as applying pressure on the edges of stones, thus breaking off fine, sharp flakes useful for knives, scrapers, or spearheads.

It was all a matter of know-how and practice, said Dr. Leakey. How much was applied proved when others tried their hand.

Fashions Jumper-dress!

by Anne Adams

It's a jumper for now—a dress for summer! For schooltime, make one in cotton plaid, another in solid colors. She'll love the blouse, too, with short or three-quarter sleeves. She's sure to rate an "A" in fashion, wearing this smart two-piece!

Pattern 4808, Girls' Sizes 6, 8, 10, 12, 14. Size 10 jumper, 2½ yards 39-inch; blouse, 1½ yards. This pattern easy to use, simple to make, tested for fit. Has complete illustrated instructions. Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly: Size, Name, Address and Style Number and send orders to: Department P.L.L., Household Arts Department, 60 Front Street W., Toronto

Last run for ghost train

The ghost train of the Ontario Northland Railway has made its last run.

After hearing eerie tales of a silent train gliding along the bush tracks at dead of night, and daring shafts of light through the trees, game warden Orel Landault and railway constable Boh Friend decided to hunt it down.

Recently they found it a home-made railway speeder with rubber tires, powered by a converted gas washing-machine motor.

It was lying hidden in the bush half a mile from a hunters' camp at Osborne. A special muffler checked the noise of the motor so that the speeder could move in silence along the tracks.

Five hunters have been charged with carrying loaded rifles in Nipissing Game Reserve. They may also be charged with trespassing on railway property. Four deer and five rifles were found nearby.

Osborne can only be reached by rail. The game warden believes the ghost train was brought to the camp in a packing case and assembled on the spot.

It carries two men and can easily be lifted on and off the rails.

After the officers found the rifles, the hunters took them to the spot where the machine was hidden.

U.S. EXPORTS TO RUSSIA UP

United States exports to Russia and satellite nations totaled \$2,066,000 in the second quarter of this year, according to the Commerce Department. This compares with \$1,662,000 in exports for the first quarter.

—By Les Carroll

Oats pool payments announced

OTTAWA.—The Right Hon. C. D. Howe, minister of Trade and Commerce, has announced that the Canadian Wheat Board had closed the 1954-55 oats pool as at the close of business on November 18, 1955.

The surplus for distribution to Western producers delivering oats to the pool between August 1, 1954 and July 31, 1955, amounted to \$3,779,605.60. The average final payment on the 69,581,184 bushels of oats delivered to the pool by producers will be 5.422c per bushel. The final payment on No. 3 Canada Western will be 6.172c per bushel. The final payment on Extra No. 1 Feed Oats will be 4.226c per bushel. The final payment on Nos. 1, 2 and 3 Feed Oats will be 4.397c, 6.276c and 6.560c per bushel respectively.

This is the second distribution of surplus funds from the 1954-55 oats pool. Last April an adjustment payment of 7c per bushel was made on all grades of oats delivered to the 1954-55 oats pool between August 1, 1954 and March 21, 1955, when the initial payments for all grades of oats were increased by 7c per bushel effective for the balance of the crop year.

In the case of the 1953-54 oats pool, adjustment or interim payments were not possible and the pool was closed out with an average final payment of 6.276c per bushel. With the final payments announced, prices realized by producers for oats delivered to the 1953-55 pool will average about 6c per bushel higher than the prices realized from the preceding pool.

Mr. Howe stated that the board will continue issuing the final oats payments to producers just as soon as the final barley payment is completed. The board is presently engaged in issuing cheques to producers covering the final payment on the 1954-55 barley pool which amounted to \$6,536,611.92.

The object of irrigation

The object of irrigation is to replenish the water in the soil so that plants have an adequate supply of moisture. In order for the plant to grow under the most favorable conditions, there must be a balance between air and water in the pores of the soil. The upper limit of this balance is called field capacity or when the soil is holding the maximum amount of water after downward movement, due to gravity, has ceased. The lower limit is the wilting point which indicates the moisture content of the soil when the plant wilts.

When the soil moisture is higher than field capacity, the soil is saturated. If the soil remains saturated for too long a period, it becomes waterlogged and plants suffer from lack of air. When the soil moisture falls below the wilting point, the plant of course dies.

The amount of water that the plant can use is that volume between field capacity and wilting point and this quantity is called the available moisture.

Canada Department of Agriculture

Samuel Gridley Howe, who devoted almost half a century to the education of the blind, invented the first method of teaching by means of raised symbols.

NO SWEAR WORDS — W. A. Craker, 92, of Omena, Mich., hopes to transcribe the unwritten Chippewa Indian language before he dies. Craker played with Indians as a child. He says that there were no swear words in the Chippewa tribal tongue before advent of the white man to what is now upper Michigan.

Puck control pays off

Phil Watson, now coach of the New York Rangers, was a fine player himself during the days of Bill Cowley, the stickhandling terror of the National Hockey League. In one game his assignment was to "shadow" the crafty Cowley—and the crowd became almost as interested in his dogged tracking of the great Boston center as it was in the close score.

Cowley took it in good spirits. When he left the ice, he often held the gate open and waved to Watson to come in and sit with him on the Boston bench.

Late in the third period, with the score tied 2-2 and play in the Ranger zone, Cowley and Watson were playing their usual game of tag out by center ice. Suddenly, Cowley put on a terrific burst of speed, picked up a pass, stick-handled past two checkers and rifled the winning goal into the net.

Then, with a big smile on his face, he skated over to Watson and shouted so everyone could hear: "You should get an assist on that one, Phil."

Really expert stickhandling has become a rare sight in modern hockey. Any young player who wants to reach the big leagues should spend a great deal of time polishing and practising his puck control. There are three basic moves—the side to side, here and back to front. Here's how they are performed:

Side to side: Move the puck over to one side, lift the stick and whip it over in front of the puck for the return sweep. Keep the elbows well out from your sides, and the arms and shoulders relaxed so the wrists do all the work. Move your hands with the puck so they are directly above and behind it all the time.

Diagonal: Similar to the side to side sweep, the diagonal requires slightly different technique. The shoulders should be turned so they are parallel to the path of the puck as it moves. The outside arm is kept well out, with the elbow pointing in the direction in which the puck is moved.

TRY AND STOP ME!

By BENNETT CREEP

In the flight kitchen of a big airline service they estimate that passengers travel about 25 miles while they toy with their appetizer, 110 miles while they eat the main course, 40 miles for the salad, and 55 more during dessert. In other words, a single dinner goes a long way—230 miles.

"Uncle Heibet," implored little Johnnie, "for your birthday the year I'd like another suite arm just like the one you gave me last year."

"I'm glad my last present was such a hit," beamed the uncle. "What made you like it so much?" Johnnie explained, "Daddy gave me 10 cents every week not to beat it."

It's tough for an honest rabbit to live in New York. While visiting the big city one time, a Kentucky matron left her pocketbook stuffed with currency, in a taxi. The driver suddenly appeared in the store she had entered, and gave her the bag. Grateful, she rewarded him with a \$10 tip. But when he returned to his vehicle, he found it plastered with a \$15 parking ticket. 3172

Back to front: This is the most difficult manoeuvre of the three, but it is well worth the time that has to be spent on it. The grip of the low hand is by the thumb and index finger only, and the arm should be close to the body. The other arm is held well out from the body. The stick is turned so the blade faces from side to side—towards the blade to the left for a left-handed shot. The position in which the puck can be moved can be increased by letting go with the low hand on the forward movement and controlling the stick with the top hand until it is brought back within reach again.

Remember, in any stickhandling movement, the most common fault is rough, hanging sweeps of the stick which cause the puck to bounce out of control.

WEEKLY BIBLE COMMENT

WILL YOU JOURNEY TO BETHLEHEM?

What a wondrous story Luke tells, of the coming of the Christ-child, and of the meaning of His coming to the world!

"Glory to God in the highest, and on earth peace, good will to men."

We are so familiar with that story that perhaps we lose some of its full significance. We can hardly picture a world without Christ and the Christmas story. And yet it is only as we think back to accounts of a world without Christmas that we can realize what the coming of Jesus meant to the world.

Much has been said about the materializing and the paganizing of Christmas. It is true that for many persons Christmas is merely a joyous festival, with little relation to the first Christmas or the Christ.

But only those get the true joy of Christmas who celebrate it as the birthday of the Babe who came to manifest the divine in the human, to live our earthly life that He might bring us near to God.

But no forgetfulness of God, or violence of men, can wipe out the reality of the holy birth in Bethlehem, or the glory that surrounded the manger there.

Within the next two weeks all who will may journey across the centuries to the outlandish of an humble inn. There, in the company of the Wise Men and the Shepherds, they will lay the treasures of their hearts before the Babe—God's eternal gift to man. Will you be there?

SAFE STORAGE

Just about this time of year, garden tools must be stored away for the winter. To avoid accidents, they should be stored safely. Those with sharp points, such as rakes and forks, are best hung by the heads on the basement or toolshed wall if they are left where they can fall on to the floor, they may be stepped on and an injury incurred. Insect sprays and powders must be put safely away where children cannot reach them. Scythes and shears should also be stored where they cannot become accident hazards.

LUNAR LOTS FOR SALE—Robert R. Coles of Glen Cove, N.Y., points to "solitons" on plot of the Eastern Hemisphere. Area shown is an enlargement of circled area on telescopic picture of moon, at left. A former chairman of New York City's Hayden Planetarium, Coles has incorporated "The Interplanetary Development Corporation". He hopes to sell moonscapes at one dollar an acre. Buyer supplies his own transportation if he wants to "moonstead" his land.

Heat softens old putty

To replace window panes, it is necessary to remove every trace of old putty so the new putty will stick. Sometimes this is difficult without damaging the wood surface.

One way to do it is to heat the old putty to soften it. New tank type propane blow torches, throwing a fine pencil flame, are handy for this job. Gently heat the putty until it is pliable. Move the flame slowly and steadily. Do not hold it too long in one spot.

Use a putty knife or s-scraper to remove the heated putty as you progress with the flame. Then apply a heavy coat of linseed oil to the bare wood to keep it from soaking out of the new putty.

A person will use about four times as much energy while bending over as while he is standing.

Holiday plan for inmates

Long-term prisoners in Belfast jail are going to be given summer holidays to improve their morale.

For the last five years prisoners have enjoyed a Christmas parade at home with a good effect on morale and all reported back to their jails.

An Ulster Home Ministry spokesman said the plan will be extended to give prisoners a week's holiday in the summer.

"Among 40 prisoners should benefit by this scheme," the spokesman said. "Prisoners serving more than three years will also be given four days' Christmas leave."

Prisoners convicted of murder or offences against the state, such as belonging to the underground Irish Republican Army, will not be eligible for holidays.

Ten Word INTELLIGRAM

Check the correct word:

- 1—Malcolm Campbell holds the world's (water) (air) speed record.
- 2—Geneva, Big Four Foreign Ministers meeting was an outstanding (success) (failure).
- 3—Unification of East and West Germany (was) (was not) agreed upon.
- 4—A definite date for the Big Four to meet again (has) (has not) been set.
- 5—Argentina's president is (Pedro Aramburu) (Eduardo Lonardi).
- 6—Sultan Sidi Mohammed ben Youssef has been (ousted from) (returned to) Morocco's throne.
- 7—Princess Margaret (has) (has not) been in seclusion since renouncing Group Captain Townsend.
- 8—Brazil is now experiencing (summer) (winter) weather.
- 9—President Eisenhower will spend most of his convalescence at (Gettysburg) (Camp David).
- 10—The First Lady will (be with him) (remain in Washington).

Count 10 for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; and 90-100, very superior.

Castles in Spain for grain storage

Castles in Spain are being put to a new and utilitarian use, reports the Department of Trade and Commerce. Like their Canadian counterparts, the Spanish grain growers are finding difficulty in storing the 1954 and 1955 crops of wheat and barley. Storage facilities were inadequate even before the bumper crops of 1954.

The Spanish National Wheat Service has acquired two castles for storage purposes and is negotiating for two more, with the possibility of securing others. The National Wheat Service is required to restore the castles, thus halting their gradual decay, and preserving their historic interest and external architecture.

Early air conditioning

Massachusetts has just discovered that it was a pioneer in the field of air conditioning.

Prowling around a sub-basement in Massachusetts' state house, built in 1797, workmen recently found a cast-iron wheel, six feet in diameter.

A check of old records revealed that this wheel was used around 1855 as part of an intricate system to keep state employees cool. Driven by a leather belt off a steam engine, the wheel once drove an even larger wheel, set flush against the wall and rimmed with a score of open funnels. Cool air was pumped upstairs through a series of brick passages.

BOZO

By Foxo Reardon

Moravian Christmas Cookies cut in festive shapes are perfect to serve with a cup of coffee when Christmas callers come.

MORAVIAN CHRISTMAS COOKIES

- 4 cups sifted flour
- 1 cup plus 2 tablespoons brown sugar, firmly packed
- 2 teaspoons cinnamon
- 1 teaspoon salt
- 1 teaspoon baking soda
- 1 cup butter
- 1 cup molasses
- 1/2 teaspoon vinegar

Measure flour, sugar, cinnamon, salt and baking soda into sifter.

Put 3 times into medium-sized bowl. Cut in butter until mixture is the texture of coarse corn meal.

Add molasses and vinegar. Stir until thoroughly blended. Cover bowl. Chill dough until very firm. Roll chilled dough, a small amount at a time, to about 1/2-inch thickness on lightly floured board. Cut with floured reindeer and Santa Claus cookie cutters. Place on greased cookie sheets. Bake in moderate oven, 350 degrees F. 8 to 10 minutes, or until edges are slightly crisp. Run spatula under cookies to loosen.

Personalities IN THE NEWS

The Catholic Women's League meeting will be held on February 3rd at the home of Mrs. Anna Jones.

David Vasek U.S.A.P. school of electronics in Mississippi, U.S.A., spent the Christmas holidays with his parents Mr. and Mrs. Louis Vasek.

Miss Marlene Madden of Vancouver, B.C. spent the holiday season with Mr. and Mrs. Louis Vasek.

James Zimka of Cranbrook, B.C., visited his grandmother Mrs. A. Myssniuk over the Christmas holidays.

Miss Beatrice Gejdos left for Calgary recently where she will seek employment.

A renewal subscription was received recently from Mr. and Mrs. George Morgan of Vancouver, B.C. They were former oldtimers of Coleman. They report they always enjoy reading Coleman news and send their best regards to all their friends here.

Mr. and Mrs. A. Fox of Calgary, spent the holidays with their daughters and sons-in-law Mr. and Mrs. G. Omelusik and Mr. and Mrs. S. Wavrecan.

Mr. Joe Zak of Coleman has accepted a position in the Federal building in Blairmore as assistant caretaker.

Mrs. Nina Bagley and family of Exshaw spent the holidays visiting friends and relatives in the Pass.

Mrs. Friedman of Calgary is visiting here for an indefinite time and while here will assist in Freeman's store.

Mr. and Mrs. John Bayon and daughter Joan of Lethbridge were recent visitors the guest of Mr. and Mrs. J. Rogers.

Miss Helen Morris, returned to Calgary after spending the Christmas holidays with her parents Mr. and Mrs. Adam Morris.

Friends of Mrs. Joyce Anderson, are pleased to see her around again after being confined to her home for the past three weeks with a sprained ankle.

On New Years Day 19 Colemanites journeyed to the ranch home of Mr. and Mrs. J. B. Fisher near Port McLeod where all partook of a sumptuous New Year Dinner Friends from Pincher Creek and Port McLeod also attended. This event every year is one which all present look forward to seeing old friends and renewing old acquaintances. Thank you Mr. and Mrs. Fischer for making this annual event possible.

Eddy Vincent has returned home after spending two weeks in the Holy Cross Hospital receiving treatment for a fractured arm.

Mr. and Mrs. L. Jennings of Salmo, B.C., visited at home of the latter's brothers, John and Harold Nelson, during the Christmas holidays. Mr. Walter Nelson, who is spending the winter months at Calgary, also spent the holidays here with his sons.

Mrs. John Baer and baby daughter are the guest of Mr. and Mrs. Dave Bouthellier of Carbondale.

Robert Hoggan of Prince George, B.C., has returned home after spending the holidays at the home of his mother Mrs. Ella Hoggan and his grandmother Mrs. E. McGrath of Carbondale.

Mrs. Gladys MacDonald and son Gordon are visiting in Prince George. Mrs. Dave MacDonald will accompany them on their return to Coleman.

Mr. and Mrs. Evan Gushul of Lethbridge visited relatives and friends here during the Christmas holidays.

Jerry Lonsbury, Michael Hill and Johnny Cousins attended Boy's Parliament Buildings in Edmonton from Dec. 28th to 30th. They were sponsored by the United Church.

Mr. Sam Oliva of Nelson, and Mr. Frank Oliva of the University of Alberta, were the holiday guests of their parents Mr. and Mrs. Dominick Oliva.

It was stated in last week's paper that Miss Jean Parker was attending the University of Alberta. Miss Parker was graduated last year from the University of Alberta, Edmonton with the degree of Bachelor of Education and is now a member of the Junior High School staff, of the Park Allen School in Edmonton.

Mr. G. McLaughlin of Vancouver, spent Christmas at the home of Mr. and Mrs. C. MacQuarrie.

The boy from way down in Oklahoma, George Jenkins Jr. returned after a well enjoyed Christmas holiday with his parents, Mr. and Mrs. G. Jenkins, and many friends.

Correction Notice

In the news story covering the election of officers of the L.A. to the Coleman Canadian Legion we neglected to state that Mrs. H. Maslen was elected President and Mrs. L. Brown of Blairmore was elected to the executive, and that Mrs. M. Clarke 1st Vice-Pres. We wish to thank those ladies who brought this to our attention.

RAILROADERS

(by Ambrose Hills)

I've a soft spot for railroaders that goes back to when I taught out Libau way in Manitoba, and the agent opened up one night to dig out an express parcel for me. He did the same for many a farmer. Some took advantage.

"They will open for me," they'd say. "He don't mind—live on the premises anyway."

So I stayed longer and harder than his company intended or expected. Most agents do. They didn't mind, back in the days when their income compared favorably with the rest of the community. Now they feel blue when farmers drive up in shiny cars after hours to ask for express. Especially when they know the railroads still carry grain at low turn-of-the-century prices.

When I read about salary negotiations now going on, I asked a railroad agent friend if he thought there would be a strike. This was his answer, and I thought it mighty reasonable:

"No! A single agent wants a strike. We do want an increase and railroad management knows we should have it. I think they'd like to pay it. At least, top management that came up through the ranks and knows what our jobs are like would sure want us to get more if possible. We lost ground during two wars when other salaried people were boosted."

"Most of all, we want a quick settlement and management ought to want the same thing."

I showed him a newspaper clipping which said railroad management had agreed to accept the arbitration board's findings as binding if the union would do the same. But the union, so far, had refused. He didn't want to make a comment on that, because he didn't know what his union leader might have in mind.

"But railroad agents don't want to tie up stock and coal shipments, or pile any more trouble on top of the wheat situation. We want a fair, prompt settlement. You can quote me on that!"

Are We Building Hazards Into Our Homes?

Home builders are tolerating, and in some cases encouraging, cut-rate electrical wiring of the homes they are building. As one result, many electrical contractors are leaving the business of wiring new homes. As another, and much more serious consequence, the standard of electrical wiring in new homes is falling below what authorities in electrical industry consider to be a practical minimum.

There is nothing to indicate that Coleman is any exception to the generally disturbing picture. And the real tragedy is that homeowners themselves are unwittingly contributing to it. The result is what the editors of Electrical Contractor of Canada—a magazine published for the electrical trade—call a "rat-race in home wiring."

The home-owner's contribution is negative, perhaps, but it is an important factor nonetheless. If we permit inadequate electrical work in our new homes for the sake of saving a few very few dollars, it doesn't really matter whether we do so deliberately or out of ignorance. The effect is the same. We are encouraging builders to use inferior workmanship and materials. If ignorance is the reason, it is high time we learned a few basic truths and then made our demands known to the home-building industry.

Whether we own our own homes, or live in them as tenants, we as householders, have a deep and lasting interest in the adequacy of our electrical wiring. If it is true that many present electrical systems, once regarded as adequate are no longer sufficient to handle the requirements of our normal living in this electrical age, we should demand a new standard of adequacy and laws to ensure that every builder meets it.

As the editors of Electrical Contractor point out, if electrical use continues to increase, the wiring in new homes built today will soon become dangerously inadequate by any standards.

We are paying a price for our apathy in every electrical fire that occurs in this country, and in every life lost through electrocution by an improperly installed electrical device. The situation is bad enough already—70 per cent of all homes in Canada are inadequately wired today, according to a survey made recently. And the largest known cause of fire loss in 1954 was faulty wiring. The bill was \$10.3 millions.

Surely these facts are startling enough, without compounding the problem by perpetuating the very conditions we want to remove. The place to start is certainly with our new homes if we ever hope to find a lasting remedy.

Jury Finds Blaimore Man Suffocated In Mine

A coroner's jury, under direction of Coroner E. J. Liesmer of Coleman, met in the Blaimore court house Thursday evening to investigate the death of Arthur James Ennis, a Blaimore mine employee, who died during the course of his duties at the tipple of the West Canadian Collieries mine in Blaimore on Wednesday morning.

The jury was comprised of Foreman Art Plant, Robert Price and Alfred Marsh, all of Blaimore. Also present were Fred Hill and John Hucik, all of Bellevue. Evidence was given by Dr. W. P. Russell of Blaimore, who attended the accident. In giving his evidence Dr. Russell stated that he had been called to the accident and saw the deceased between 9 and 9:30 a.m. lying on a platform at the mine where some workmen were applying artificial respiration to the victim. After examining the deceased, Dr. Russell pronounced Mr. Ennis dead. From all appearances, Mr. Ennis had died from suffocation and had been dead for some time, stated Dr. Russell.

Dr. R. P. Stewart of Blaimore, who performed the autopsy, stated that there were no abnormalities and that in his opinion death was due to suffocation or smothering.

A set of plans of the accident scene were supplied by Dante Pozzi mine surveyor of the West Canadian Collieries.

Evidence was then given by Frank Patera of Frank, a greaseman employed by the collieries, and Joe Leskovsky, the tipple foreman.

From the evidence submitted it was shown that Mr. Ennis was in charge of a coal bin that was fed from the main tipple of the mine. Mr. Patera had spoken to Mr. Ennis during the early morning, but then had proceeded about his duties. According to Mr. Leskovsky, Mr. Ennis' absence from his place of work was noticed by Philip Marucci who informed Mr. Leskovsky that he had not seen Mr. Ennis for some time. Becoming worried at the workman's absence, Mr. Leskovsky began to examine the bin cared for by Mr. Ennis which was partly full but could see no sign of him, he said. Mr. Leskovsky then ordered the bin to be emptied during which time Mr. Ennis was seen in the bin. He was immediately removed and artificial respiration applied while other help was summoned.

After hearing the evidence, the jury returned the following verdict: "We, the jury, find that Arthur Ennis died from suffocation due to a fall from a catwalk into the raw coal bin at the Greenhill mine tipple of the West Canadian Collieries on January 4, 1956, between the hours of 8:30 and 9 a.m."

Mr. Ennis, 56 years of age, was born in Innisfail on October 21st, 1899.

He is survived by his widow, Jean of Blaimore; one son, Louis of Blaimore; three daughters, Mrs. Jean Deharnals of Blaimore, Hazel Ennis and Mrs. Virginia Tomlins of Calgary; four sisters, Mrs. Hazel Clarke of Vancouver, Mrs. Marlin Bernard and Mrs. Elaine Price of Duncan, B.C., and Mrs. Gladys Verquin of Seattle, and one brother, Delbert of Blaimore.

Funeral services were conducted from the Blaimore United Church

at 2 p.m. on Saturday, January 7, and interment was in the Blaimore Union cemetery. The Rev. Roy Chubb of Blaimore officiated at the services.

BEFORE THE MAGISTRATE

Walter Kotko of Coleman appeared before Magistrate F. S. Radford of Blaimore this week on a charge that during the past four weeks he had unlawfully threatened to do bodily harm to Bruno Yuzkiewicz, also of Coleman, who fears that he will cause him personal injury. For the offence Kotko had to enter a \$500 recognizance to hold the peace until January 3, 1957.

Mickey Gleave and Gregory Gleave, both of Bellevue, appeared before Magistrate Radford charged with contributing to the delinquency of a juvenile with regards to the liquor act. Each youth was fined \$20 and costs.

William Charles Dicum and Lawrence Waddell, both of Manitoba, were arrested by RCMP constables in Bellevue for evading a board bill in Red Deer. Both men were escorted to Red Deer to stand trial.

Oscar Krywolt of Coleman appeared before Magistrate Radford on a charge of driving while his ability to do so was impaired by alcohol. For the offence Krywolt was fined \$100 and costs and had his driver's licence suspended.

T. Houde of Bellevue was fined \$5 and costs for having no tail light on the vehicle he was driving.

William Jansen of Cranbrook was arrested by RCMP constables of the Blaimore detachment and was escorted back to Cranbrook, B.C., where he will face charges of contributing to the delinquency of a juvenile girl.

Calvin Godfrey of Coleman was fined \$20 and costs for being intoxicated in a public place.

T.B. subscriptions slow this year

The Lethbridge Kinsmen Club TB Christmas Seal Sale is still \$2,549 short of the quota according to Chairman R. J. McCulloch. "No doubt many who intend to purchase their Seals have overlooked doing so in the rush and turmoil of the Christmas Season, and we are still confident that we will reach our quota," said Mr. McCulloch.

Alberta Tuberculosis Association officials report returns from the province amounting to \$104,000 with an additional \$50,000 required to make the provincial objective. In commenting upon the progress of the campaign, Mr. T. R. Alexander, vice-president of the Alberta Tuberculosis Association, said, "It is apparent unfavorable weather conditions have interrupted mail services, particularly in rural areas, and we expect that daily receipts will be maintained to enable us to reach our objective. Receipts from the annual sale of Christmas Seals is our only source of revenue to finance the work of the Association throughout the year in T.B. prevention, rehabilitation of T.B. patients and health education."

Christmas Seal contributions are income tax deductible and receipts will be sent on request. Contributions may be sent to the Lethbridge Kinsmen Club TB Christmas Seal Sale Committee, City Hall, Lethbridge, Alberta.

Philotics 'find' proven forgery

A high school boy at Kerwood, near London, Ont., thought for a time he had come across a philatelic treasure worth perhaps \$10,000. But when he obtained an expert report, the item turned out a forgery.

Donald F. Demary, the youthful stamp collector, was in possession of an envelope bearing what appeared to be a provisional five-cent stamp issued by the postmaster of New Haven, Conn., during a two-year period in the 19th century when U.S. postmasters, by law, could issue their own stamps.

Genuine United States provisionals were issued by postmasters between 1845, when the U.S. Postal Act became effective, and 1847, when an act of Congress authorized adhesive postage stamps. Only six of these envelopes are known to be in existence.

Donald submitted his envelope to a Toronto expert and it was passed on to the Philatelic Foundation in New York for investigation. They declared it a forgery. How long ago the envelope was forged, no one could guess.

World Happenings In Pictures

MERL CAIN AND MARGARET NICHOLSON

SHIRLEY SHINGLER

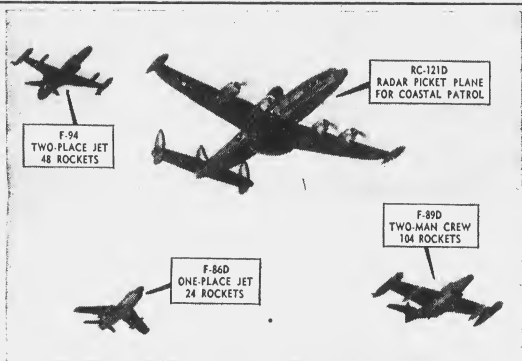

FACE MURDER CHARGE—Five teen-aged girls from an Akron, O., detention home, face first degree murder charges in the death of Mrs. Eula Bonham, matron of the home. The girls escaped from the institution after tying the matron and gagging her with ammonia soaked rags. She died of strangulation. Merl Cain and Margaret Nicholson, left, surrendered a few hours after their escape. Ruth Birchler, top right, and Shirley Shingler, lower left, were captured in a restaurant. The fifth, Mrs. Zella De-roest, 16, gave herself up. Police said the girls seemed sorry. They quoted Miss Cain as saying "the matron was like a mother to us."

YANK GIVEN COMMAND OF RAF SQUADRON—Major Ray Roberts, who hails from Savannah, Ga., the drawing deep south—has just taken over command of one of the proudest fighter squadrons in the RAF at Leuchars, Scotland. He is one of about 100 U.S. officers doing duty with the RAF. "I'm just one of the chaps" drawled the modest major.

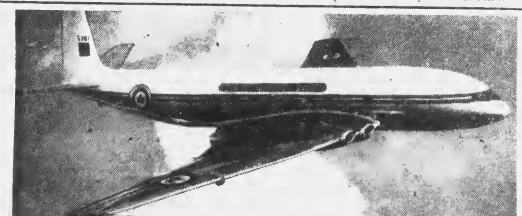

HEAVY SEAS POUND RADAR TOWER—Huge seas beat up around the radar island Texas Tower, 100 miles off the Massachusetts coast and unattended 37 USAF technicians who had gone out to inspect the tower. They were safely removed and taken to Boston. Waves are shown pounding the decks of the tower which is normally 100 feet out of water.

... AND THE ROCKETS' RED GLARE ...—Francis Scott Key had a vastly different type of rocket, the signal rocket—in mind when he penned the words to the "Star-Spangled Banner". Then, they "gave proof thro' the night that our flag was still there." Today, supersonic rockets, deadly air-to-air missiles, give jet-propelled proof that the Air Defense Command is prepared to keep the flag flying should the need arise. Pictured, above, are the four major aircraft of the Command. Humps on top and belly of the RC-121D picket patrol ship are jam packed with radar and other electronic detection devices.

THE WINNERS, and still champions of Canadian football, the Edmonton Eskimos relax in the dressing room with Earl Grey's big silver cup. Jackie Parker, the dazzling Ebbie, quarterback, holds the prized trophy flanked by starry centre Kutt Burtis (left) and halfback rompin' Rollie Miles.

COMET JET PLANE—One of the RCAF's two Comet jet planes, grounded two years ago when two British Comets were lost when cabin pressure failed under stress, was flown from Ottawa to Toronto. Both planes, each of which cost \$3,544,000, will be in storage until the Air Force figures out what to do with them.

WANT A DATE?—Harlene Miller, 17, is the girl to see. She has a whole bunch of dates for someone. Naturally. She was chosen Date Queen of 1955 at Phoenix, Ariz., heartland of one of the few date-growing areas in this country.

GARY COOPER MAKES TV DEBUT—Veteran movie star Gary Cooper made his singing debut on television and NBC officials said he sang "just as casually and pleasantly as he talks." Gary said it sounded more like "log-sawing". The broadcast was made in Hollywood where he is making civil war movie with Dorothy McGuire.

PUZZLE—How did barber Alphonse Signaro of Iron Mountain, Mich., spend his time over a recent weekend? Hint: He didn't attend an Elk's convention.

FACING MOROCCO'S DESTINY—Seated again on the throne of Morocco after two years in exile, Sultan Sidi Mohammed ben Youssef is flanked by sons Moulay Hassan, left, and Moulay Abdallah. From his throne at Rabat, ben Youssef seeks to weld dissident factions in his own country into an instrument of government which will effect full sovereignty for the strife-torn French protectorate.

OUR COMPLETE SHORT STORY—

Love at Wilder Junction

By ANNA E. WILSON

RIPLEY CONWAY was checking the fire equipment in his truck when a tall girl on a shambling horse rode into view. Opposite Rip, she pulled her horse to a walk and dangled slowly.

"Howdy, Ripley."

Ripley's voice was faint. "Howdy, Glenna."

Glenna stared stubbornly at a fly on Ripley's nose. "Bill's coming in today. I had a letter."

Ripley was bent over the truck checking shovels. He didn't look up.

"Weather's been pretty dry hereabouts, Glenna. Better watch out for fires. Wilder Mountain's a bad place to get caught in."

"Thanks, Ripley." Her voice hardened and she kicked her horse into motion. "Bill will be over to see you later," she called back as he got out from behind the truck. He stared after her.

For a minute he had had an idea that Glenna had been going to say something. Something important. Now all he could see was the back of a tall girl on a horse—both loaded with camping equipment. It was remarkable how fast that shambling gait of Ripley's carried them. Rip put his notebook in his pocket and made for the station.

Lank Langman raised his long frame lazily from a split-bottomed chair and spoke without looking at Ripley. "Wasn't that Glenna Colby who rode by here? While back, I thought you and Glenna'd be making a match of it but seems lately you're giving each other the cold shoulder."

Rip was half way up the fire tower. He didn't answer Lank. He had his own thought about Glenna.

He'd met her first when he'd taken over the job of fire warden two years ago. She'd ridden in with her brother on the way up to his camp on Wilder.

"Howdy, stranger," Bill had said. "See you've been taken over the station. My name's Bill Colby. This is Glenna."

You could see they were brother and sister. He stretched out a lean hand to be met by one as brown as his own. He'd noticed then that her eyes were clear and honest.

She and Bill had ridden over often after that and he'd spent his first leave with them—riding, fishing and shooting. A short month ago, he'd only been waiting for his next relief to ride into town to buy a ring before asking Glenna to marry him. It was then that Glenna had turned up with a letter from Sally Blanchard.

He'd already forgotten his brief engagement to Sally during the war. Sally had turned him down. Hap Haskett in the airforce. Hap had been involved out and was still in hospital and now Sally had written to Glenna telling Glenna about her engagement to Rip without mentioning Hap—leaving Glenna to draw her own conclusions.

He'd tried to explain things but a coolness had sprung up between him and Glenna. He wasn't sure when Glenna didn't believe him when he told her his engagement had been broken off or whether she was just hurt because he hadn't told her about the affair. He wished he could find a way to prove to Glenna how much he loved her.

She must have taken a short cut back through Wilder for he didn't see her all morning. It was

early afternoon before he saw a purple shadow of snow rising north of the Wilder range which rapidly turned to scarlet. He tapped out a hot message and, minutes later, saw a plane streaking north and knew that already Jan Haas would be rounding up five-fighters. Jan pulled in at the station to check over his trucks as they passed him. His voice was sharp.

"Lots of dead timber this side of Wilder. Fire got into it and is making headway against the wind which is in our favor. So is Wilder Gorge. One end goes into the river at an angle but the other end runs out at that stretch of rock where there's nothing to feed on. If we can hold it by starting a slow blaze this side of the gorge the wind will drive our fire into the advancing blaze and we can fight fire with fire."

From the fire tower five minutes later, Rip could see the trees falling along the gorge as the fighters went into action, working towards the junction of the gorge and the river. Once the river had split at this junction, part flowing into the gorge, but a pulp company had walled off the gorge, turning its water into the main stream and built a power dam above it.

The phone rang and Lank's startled voice reached up to him. "Bill Colby's landed and wants to know if Glenna's here. She hasn't come in yet."

Rip's breath caught raggedly. Glenna was trapped on Wilder.

Rip called for Lank to mind the station and raced for the bridge only to ride into Haas' fire.

He raced for the junction, glad to find that the fire hadn't reached the head of the gorge. A glance showed that he couldn't drive his truck through that deep cleft and without it he had no time to begin four interminable years at school for the deaf but the very determination to get knowledge out short her education.

"Straining my injured eyes through a magnifying glass, I read, read, read my sight away," she said. "The tears were the bitterest of my life."

Then Albert McGuffin, a deaf machinist, was drawn to the girl nicknamed "Little Spittler" by her companions. He tapped out a proposal on her hand and they were married.

"I did all my own work and reared the children without outside help," she said. "When they were tiny I slept with the youngest at my side, and used to wake myself during the night to feel him for vibrations of crying."

"I did my own baking, pouring vanilla extract slowly over, finger to judge a teaspoonful. Ironing has never been an easy chore, but it gets done. Mending the clothing was the only impossibility, and my mother helped with that."

The children, sensing their mother's need, learned manual communications early and were helpful and resourceful beyond their years.

When she reached 40 and the children were grown, Mrs. McGuffin felt that she needed more education. She studied Braille, touch-typing and won two scholarships for special home study from the University of Chicago.

Then she began to study the Japanese text three times as much fish as North Americans.

HARMLESS SPACEMAN—In New York, an armless but harmless spaceman draws all other floats in the annual parade, which launches Christmas season. Spaceman lost arm when it brushed against building. The sign deflated and fell to the ground.

Handicapped woman busy editing Braille magazine, helping others

One of the busiest women in Vancouver is Mrs. Marjorie McGuffin, blind and deaf since childhood and mother of three.

At 50 she edits a Braille magazine, is organizing a home for the deaf and blind of Canada and does her own cooking and housework.

Measles gradually robbed her of eyesight and hearing. At 11 she began four interminable years at school for the deaf but the very determination to get knowledge out short her education.

"Straining my injured eyes through a magnifying glass, I read, read, read my sight away," she said. "The tears were the bitterest of my life."

Then Albert McGuffin, a deaf machinist, was drawn to the girl nicknamed "Little Spittler" by her companions. He tapped out a proposal on her hand and they were married.

"I did all my own work and reared the children without outside help," she said. "When they were tiny I slept with the youngest at my side, and used to wake myself during the night to feel him for vibrations of crying."

"I did my own baking, pouring vanilla extract slowly over, finger to judge a teaspoonful. Ironing has never been an easy chore, but it gets done. Mending the clothing was the only impossibility, and my mother helped with that."

When she reached 40 and the children were grown, Mrs. McGuffin felt that she needed more education. She studied Braille, touch-typing and won two scholarships for special home study from the University of Chicago.

Then she began to study the Japanese text three times as much fish as North Americans.

Red Cross international aid from Canada at \$235,000

Canadian Red Cross shipments and grants for international relief during the first nine months of the year amounted to \$234,916.95.

In releasing a statement on this phase of Red Cross work, the Society pointed out that the expenditure did not represent the total value of the goods which were forwarded to many nations overseas.

Saskatchewan women who do voluntary sewing for the society have shared in this effort by making over 17,000 articles of clothing. These gifts went to those in need as follows: Egypt, 12 cases, containing 5,465 articles; Lebanon, 20 cases, containing 7,824 articles.

Knitted and sewn articles produced by volunteer workers of the Women's Work Committee filled 485 cases. These were sent to Ceylon, England, Germany, Gaza, Korea, Lebanon, Norway, Pakistan, Yugoslavia and the League of Red Cross Societies in Geneva and Istanbul.

Canadian Junior Red Cross international relief amounted to \$79,141.76. Assistance included food, drugs, health kits, school supplies and clothing. Shipments were sent to Albania, Austria, Belgium, Bulgaria, Ceylon, Ecuador, Egypt, England, Ethiopia, France, Gaza, Germany, Greece, Hungary, India, Iran, Italy, Jordan, Korea, Lebanon, Luxembourg, Nicaragua, Spain, Switzerland, South Vietnam and Yugoslavia.

General funds of the Canadian Red Cross also provided for an expenditure of \$57,701.24 for flood victims in India, Pakistan and the British West Indies, assistance to the Korean Red Cross and other international expense items.

The Canadian Red Cross pointed out that transportation costs were reduced to a minimum as many shipments were airfreighted through the courtesy of several commercial airlines.

When aureomycin was added to swine rations containing low, medium, standard, and high levels of protein the smallest benefits of the aureomycin, in terms of rate of gain and feed efficiency, were obtained at the high level of protein. Greatest benefit from aureomycin was obtained in the ration of medium protein content. The rations used ranged from 13 to 19 percent protein.

From 12 to 15, and from 11 to 13 percent protein, the periods of weaning to 130 to 136 pounds, and 130 to 200 pounds, respectively. Each ration was fed with and without antibiotic.

The results from two trials involving 104 pigs at the Experimental Farm, Melfort, Saskatchewan, showed that, over the entire growing-fattening period, the addition of aureomycin increased rate of gain by 4.4 to 13.1 percent, increased feed efficiency by 4.0 to 8.4 percent, and reduced feed cost per pound of gain by 2.4 to 4.2 percent depending on the level of protein in the ration.

Where no antibiotic was fed, there was a difference in average daily gain per pig of 13 pounds between the low and high protein rations. Pigs on the high protein ration required 28 pounds less feed to put on a pound gain than the pigs fed the low protein ration. However, this increase in feed efficiency was offset by the higher cost of the higher protein ration with the result that gains on the low protein ration were made at a feed cost of 1.2 cents less per pound than those made on the high protein ration. On rations containing aureomycin the same general trend was observed.

In both trials, cheaper gains were obtained on the low protein ration plus aureomycin. Rate of gain compared favorably with that obtained on any of the other rations without antibiotic.

Ten vice-presidents of the United States went on to become president.

When the time came for the reading of the farmer's will, it was found that all the property was left jointly to his two sons, Otto and Mattson. But the boys found it impossible to agree on the division of the estate.

They took the problem to the local professor for solution.

Professor: "Quite simple. You, Otto, will divide the property as you see fit."

Otto heaved and Mattson's face clouded.

Professor: "And you, Mattson, will take whichever half you please."

Centers predominate as coaches

Three of the six coaches in the National Hockey League this season gained their fame and fortune as players while performing at the centre position for their respective teams. The oldest coach in the N.H.L., Dick Irvin of Chicago, was one of the highest-scoring centres of his era. He played for Chicago the first three seasons the Black Hawks were in the N.H.L. and was a star in the W.C.H.L. before then.

Milt Schmidt and Phil Watson were the standout centres of Boston and New York, the teams they are currently coaching, for many years.

Joe Blake was an All-star left winger as a player with Montreal Canadiens. This means that four of the six N.H.L. coaches were forwards, as King Clancy of Toronto and Jimmy Skinner of Detroit were Defencemen in their playing days. Clancy was one of the game's greatest rushing defencemen with Ottawa and Toronto. Skinner never played in the National Hockey League but starred for years in minor pro ranks and Top Flight senior competition in Canada.

The marker, which was erected by the Men's and Women's Canadian Club of Ottawa, was unveiled by Hon. Jean Lesage, Minister of Northern Affairs and National Resources. The portage was declared a historic site by the Historic Sites and Monuments Board of Canada in 1954, and the property that it crosses placed in the custody of the Federal District Commission by its owner, the Gatineau Power Company.

Shown on the large plaque is a fur-trade canoe manned by 14 voyageurs shooting a rapids while nearby are the actual stone steps and the rock causeway built by the voyageurs to ease the movement of heavy loads over the portage. Another reminder of the 300-year-old portage is found near the marker where two life-sized voyageurs canoe paddles rest against a large granite boulder.

Other historic Ottawa river portages have been obliterated by canals, power dams, or industrial sites. Maintenance of water levels has helped protect the site while youngsters used the portage route to reach the river have preserved its identity.

Fireproof your Christmas tree

Buy enough ammonium sulphate to equal the weight of your Christmas tree.

Dissolve this in water. One pound of ammonium sulphate to 1 1/2 pints of water. Make a fresh cut on the trunk so that the moisture can be absorbed. Stand in a cool place for three or four days before decorating it.

Silver is 10 times heavy as water.

HOPPING MAD—Wisconsin's Dick Kotian, left, has perfect justification for being up in the air over this play. Minnesota's Dick Larson has just intercepted a pass intended for Kotian during a grid battle at Minneapolis, Minn.

Frank slide escapee is killed

A man who was one of those who miraculously escaped death in the Frank Slide of 1903, was killed Wednesday morning as the result of an accident in a Blairmore coal mine.

Arthur James Ennis, 56, of Blairmore, met death while working at the West Canadian Collieries "tippie" here.

Mr. Ennis is believed to have slipped into a 15-ton coal bin shortly after the shift began at 8 a.m. He was in charge of the bin at the time.

Found by workmen

He was found by three fellow workmen at 9 a.m. and artificial respiration was applied by workmen and later by doctors but with-

out success.

The workman had fallen into the same bin three months ago but was not seriously injured. Following the first mishap the company built suitable guard rails, steps and a platform around the bin.

District mines inspector Phillip Mason of Bellevue investigated the accident. An inquest is expected to be held under the direction of E. J. Liesemer of Coleman.

Before working for the coal company Mr. Ennis had been in charge of coal hauling in Blairmore and was at one time well known in Crow's Nest Pass hockey circles. He also served in the First Great War.

Survivors

Survivors include his wife, Jean of Blairmore; one son, Louis of Blairmore; three daughters, Mrs.

Jean DeHarnais of Blairmore, Miss Hazel Ennis of Calgary, and Mrs. Virginia Tomlins of Calgary; one brother, Delbert of Blairmore; four sisters, Mrs. Hazel Clarke of Vancouver; Mrs. Marian Bernard and Mrs. Elaine Price of Duncan, B.C., and Mrs. Gladys Verquin of Seattle, Wash.

He was predeceased by his mother, Mrs. Enoch Williams of Victoria, B.C., in 1955.

Coleman Girl Weds Princeton Man

A quiet but pretty wedding was held in Naramata, B. C., on December 10, when Miss Margaret Hogan of Coleman, and Mr. William Kelly of Princeton, B.C., were united in a double ring ceremony by Rev. R. P. Stobie of Naramata. Their only attendants were

Grant and Villa Willan. The bride is the only daughter of Mrs. Ella Hogan and the late Robert Hogan of Coleman. The groom is the only son of Mr. and Mrs. Peter Kelly of Princeton.

For her wedding the bride chose a two-piece dress of ivory bengaline studded with rhinestones, with matching accessories and an orchid corsage.

A reception was held at the home of Mr. and Mrs. Grant Willan following the ceremony.

On their return from a trip to the coastal cities in the western states the happy couple held open house for their friends. The tea table was centred with a three-tiered wedding cake flanked by vases of mums. They were the recipients of many lovely gifts.

Mr. Kelly is employed by the B. C. Telephone Co. as journeyman.
